SCHUBERT UCHIHASHI KUGEL are master architects who can combine eclectic and polystylistic themes, abstract ideas, stories and mini-dramas into a unified statement, and then let it sound symphonic, orchestral, cinematic, chaotic and aggressive—even toying with a child-like song theme. All this in a matter of seconds, before spicing it up with tension-filled passages or provocative soothing moments before climaxing in maelstrom-like eruptions. The affinity between the three players is especially amazing, considering the all-improvised nature of this music, and when all three lock in, the music becomes breathtaking.
